

A collection of black metal light pole adapters and brackets is shown against a background of a snowy street at night. The background shows streetlights, a building with a "Giant" sign, and a snowy road. The adapters and brackets are arranged in a way that highlights their various shapes and sizes. One large L-shaped bracket is positioned horizontally, while others are shown in various orientations, including a bullhorn bracket and a tenon adapter.

**Commercial Grade Quality**

**Wall & Side Mount Brackets**

**Bullhorn Brackets**

**Tenon Adapters**

## Light Pole Adapters & Brackets Series

### Key Features & Benefits

Our collection of Light Pole Adapters and Brackets are designed with quality in mind. The materials and manufacturing processes selected result in a commercial-grade product to exceed your project needs.

Offering a selection of tenon adapters, bullhorn brackets, along with wall and side mount brackets for today's most popular applications, these Light Pole Adapters and Brackets help to retrofit existing poles and provide versatility when planning new installs.

- Constructed from high grade steel to meet strict quality standards
- Tenon adapters designed for poles with open tops are a great alternative to replacing existing poles during a retrofit project
- Wall mount brackets provide an alternative when light is required on building perimeters and wall packs or other wall-mounted fixtures just won't work
- Increase coverage and versatility with bullhorn brackets that allow up to four fixtures to mount to a single pole
- All pole adapters and brackets are backed by our worry-free, 10 year warranty

# WHY CHOOSE ADAPTERS?

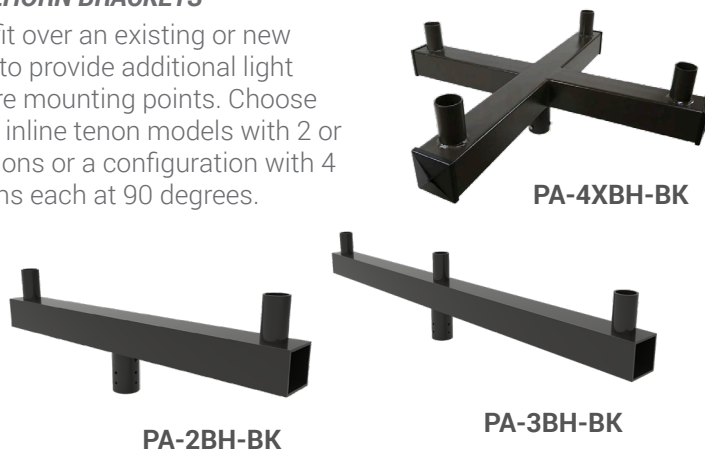

## WALL & SIDE MOUNT BRACKETS

Mounted to either a wall or square poles, the brackets provide a horizontal tenon or a tenon spaced from the vertical surface to place a fixture exactly where you need to.

## BULLHORN BRACKETS

Slip fit over an existing or new pole to provide additional light fixture mounting points. Choose from inline tenon models with 2 or 3 tenons or a configuration with 4 tenons each at 90 degrees.

## TENON ADAPTERS

Available in 3" / 4" / 5" sizes for round poles and 4" / 5" sizes for square poles, these tenon adapters help to secure fixtures to existing poles or work with new installations.

WALL BRACKETS					
MODEL#	DESCRIPTION	WEIGHT	MATERIAL	COLOR	USE / APPLICATION
WB-90RT-BK	Wall Bracket, 9" Right Angle Tenon	2.3 kg / 5.0 lbs	Powder Coated Steel	Matte Black*	Mount with 2 3/8" tenon
